Bingo is a game of chance, but the difference between bingo and other such games is that bingo is a sociable game where you are not in direct competition with anyone else or even the bingo hall. Someone has to win the bingo game and this facilitates an enjoyable atmosphere where you can play and have fun with other players. In the 'real world' going to bingo can be a night out, where you can let you hair down, have a laugh and maybe win some cash while you're at it. Playing bingo online has retained that sociable element where even though you can play in the comfort of your own home, there is still the element of community by way of the chat rooms, participating in chat games and knowing that there are players out there that you can interact with.
